# GATEWAYPRO

COMMERCIAL  
POWER AND WATER  
MONITORING

[www.dtect.co.za](http://www.dtect.co.za)

## WHAT IS GATEWAYPRO?

GatewayPro specialises in the monitoring and management of postpaid power and/or water supply into commercial housing and/or holdings such as hotels and restaurants.

### BENEFITS OF THE SOLUTION INCLUDE:

- » Each GatewayPro can monitor 25 sensors.
- » Each sensor is addressable enabling bi-directional communication for readings to the reporting environment and actions to be taken at the sensor level.
- » GatewayPro is completely autonomous meaning it does not rely on external parameters to trigger an alert or take an action if required.

#### REALTIME READINGS

dTect GatewayPro gives you the ability to monitor and manage your own electrical and/or water readings.

#### ACCESSIBLE ANYWHERE

With dTect GatewayPro you are able to pick up your power and/or water readings anywhere.

#### CONSUMPTION REVIEW

dTect GatewayPro allows you to compare your on-premise readings to your utility statements.

#### EXTENSIBLE GATEWAY

Do you want a smart unit that does it all? dTect GatewayPro gives you this ability.

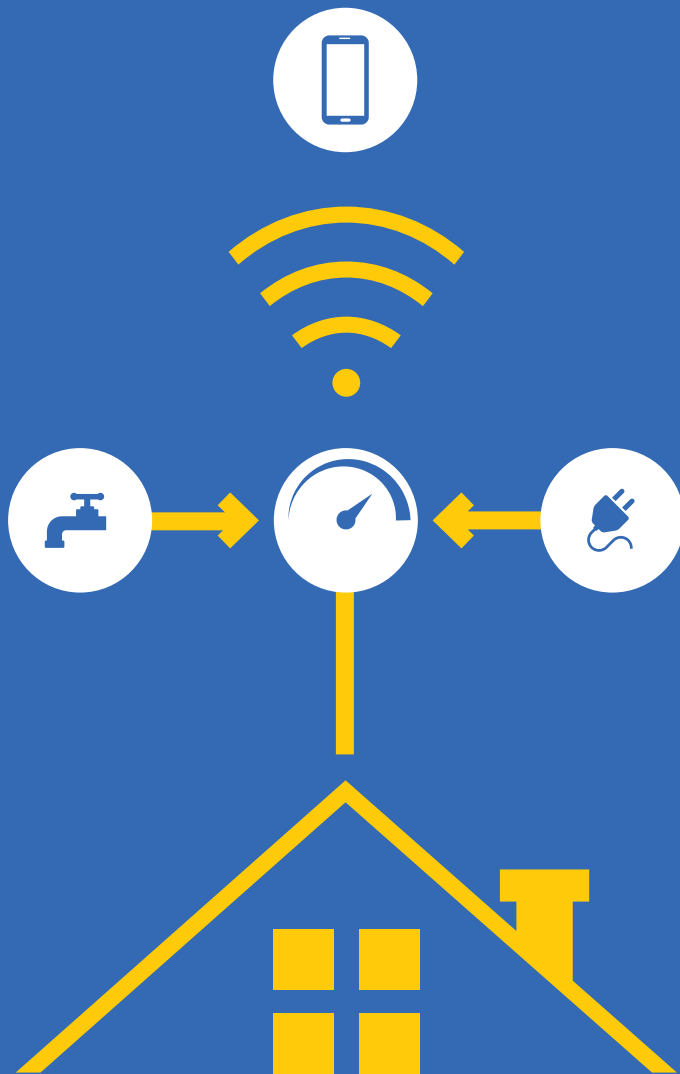

#### REMOTE CONTROL

dTect GatewayPro gives you the functionality to be able to switch off your power and/or turnoff your water supply remotely.

#### PREVENT WASTE

dTect GatewayPro gives you peace of mind that excess water and/or power usage is curtailed.

- » Prevent wastage!
- » Manage costs!
- » Remain informed!

## WHY GET GATEWAYPRO?

### PRODUCT INCLUDES:

- » dTect managed/monitored instance (comms included);
- » Water and/or power usage monitoring available in one;
- » Online dashboard oversight of individual sensors (charged monthly);
- » Online split usage reporting (includes scheduled reporting);
- » Facilitation of up to 25 addressable sensors per gateway;
- » 1 year warranty if installed by a dTect accredited installer.

## RESIDENTIAL SOLUTIONS?

Yes! **leakalert** allows you to remain informed of your residential water consumption, through the convenience of an online portal or mobile app (subscription based) or directly off the unit. It also offers peace of mind should a leak be present on your property that the water will automatically be switched off and a notification sent to you. Similar functionality is offered through **wattalert**.
